WHAT IS A CHEMICAL PEEL?

Chemical peels are one of the most popular non invasive cosmetic treatments in the world. Peels come in different strengths depending on your skin's condition. Chemical peels are an effective method of removing damaged surface skin.

They remove the top dead layers of skin thus inducing new cell formation, increased cell turnover and decongesting blocked pores. This gives your skin a refreshed, even and healthier looking appearance.

Skin conditions like active acne, oily skin, blemishes, pigmentation, sun damaged and aged skin all benefit from chemical peels. It is important to have your skin doctor assess your skin as to the level of peel your skin needs.

We offer a variety of medical grade treatments ranging from superficial to deep peels. Our medical grade peels are professionally administered by doctors and advanced trained skin health therapists depending on their strength and your skin's condition.

Before & after chemical peel skin micrographs

COSMETIC BENEFITS:

- ✓ Smoothing fine lines
- ✓ Reversing sun damage & aged skin
- ✓ Improving pigmentation & age spots
- ✓ Decongesting blocked pores
- ✓ Improving active acne
- ✓ Evening out appearance and texture

PETER FRAMPTON

CINEMAGRAPHIC MAKEUP ARTIST OSCAR WINNER FOR BRAVEHEART

My name is Peter Frampton and I have worked for 30 years as a cinemagraphic makeup artist. I have worked on many famous films and with some of the world's biggest movie stars.
I won an Oscar award for the movie 'Braveheart'.

In this time I have worked on set locations all around the world. Unfortunately I have Celtic skin which does not go well with the sun and harsh climates and as a result my skin has suffered. I now have a lot of sun damage which has caused premature ageing, pigmentation irregularities, fine lines and blotchy skin. Now that I live in Australia I want to do the best for my skin so I consulted Skin Alert Paradise Point as to the best pathway to achieve this.

A skin health plan was organised for me which included skin education along with the use of "allmedic" doctor only skin products. I had a chemical peel which took approximately 20 minutes. The procedure for me was easy with minimal downtime. My skin is much softer with less pigmentation & sun damage, fine lines and I now have an even skin appearance. From first hand experience I highly recommend the chemical peel from Skin Alert. Their service and results are star quality.

A handwritten signature in blue ink that reads "P. Frampton".
